

“

Your partner for
single gases, multi-
gas mixtures, VOC
mixtures and
custom gas
mixtures.

ABOUT US

Gas Republic is your specialist in high-quality calibration gases for GC, gas detection and emission measurements.

**GAS REPUBLIC
CALIBRATION AND
REFERENCE GASES**

**PRECISION FOR
YOUR
MEASUREMENTS**

APPLICATIONS

Gas detection: Reliable calibration gases for testing and calibrating gas detectors in industrial environments.

Process industry: High-quality reference gases for process control and quality assurance in the petrochemical and chemical industries.

Gas Republic supplies precision gases that meet the highest industry standards for all your measurement and calibration applications.

SPECIFICATIONS

Technical Details

Cylinders: 34, 58 and 110L aluminum cylinders. Pressure up to 200 bar. Balance gases: N₂, Air, He, Ar. Certification according to ISO 9001 2015 certificate 2024-2027 EN.

Applications

Emission measurements: Certified calibration gases for continuous emission monitoring (CEMS) and periodic measurements in accordance with legislation and regulations.

Industrial Use

Laboratory Analysis (GC): Accurate reference gases for gas chromatography and analytical applications in research and quality control laboratories.

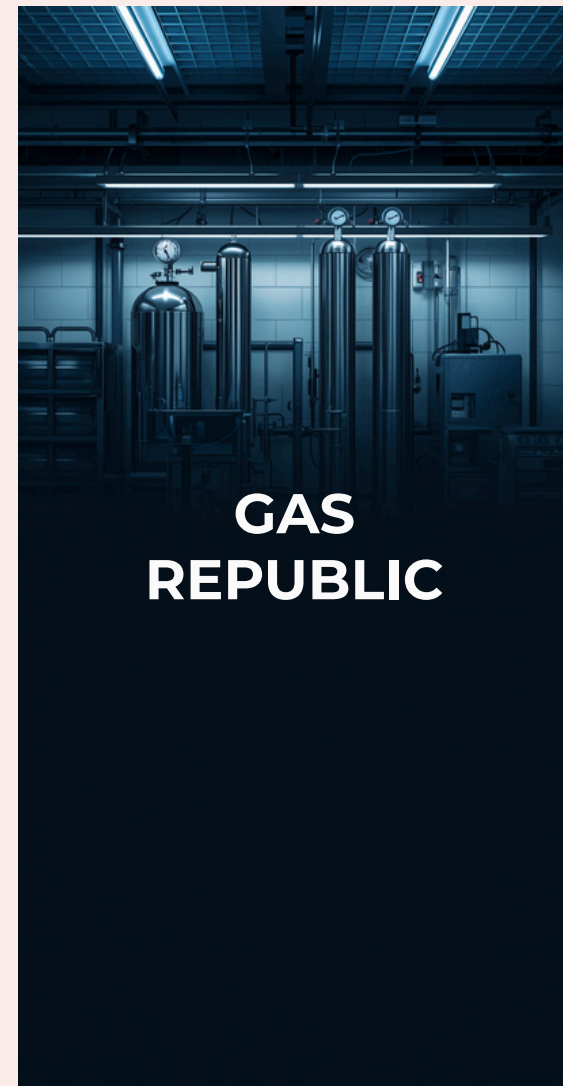

“

High accuracy, fast delivery and customer-specific solutions for your precision gases.
